1 hour 30 minutes

**INSTRUCTIONS TO CANDIDATES**

- Write your session number in the boxes above.
- Do not open this examination paper until instructed to do so.
- A graphic display calculator is required for this paper.
- Section A: answer all questions in the boxes provided.
- Section B: answer all questions on the answer sheets provided. Write your session number on each answer sheet, and attach them to this examination paper and your cover sheet using the tag provided.
- At the end of the examination, indicate the number of sheets used in the appropriate box on your cover sheet.
- Unless otherwise stated in the question, all numerical answers should be given exactly or correct to three significant figures.
- A clean copy of the **Mathematics SL information booklet** is required for this paper.
- The maximum mark for this examination paper is [90 marks].

0112

## SECTION A

2. [Maximum mark: 5]

Let  $A = \begin{pmatrix} 2 & 2 & 1 \\ 3 & 1 & 0 \\ 4 & 2 & 1 \end{pmatrix}$ .

(a) Write down  $A^{-1}$ .

[2 marks]

(b) Hence or otherwise, find  $B$ , given that  $AB = \begin{pmatrix} -1 & 6 & -1 \\ 5 & -1 & 3 \\ 5 & 2 & 7 \end{pmatrix}$ .

[3 marks]

3. [Maximum mark: 6]

Let  $f(x) = x^3 - 2x - 4$ . The following diagram shows part of the curve of  $f$ .

The curve crosses the  $x$ -axis at the point P.

- (a) Write down the  $x$ -coordinate of P. [1 mark]
- (b) Write down the gradient of the curve at P. [2 marks]
- (c) Find the equation of the normal to the curve at P, giving your equation in the form  $y = ax + b$ . [3 marks]

5. [Maximum mark: 6]

Let  $f(x) = a \cos(b(x-c))$ . The diagram below shows part of the graph of  $f$ , for  $0 \leq x \leq 10$ .

The graph has a local maximum at  $P(3, 5)$ , a local minimum at  $Q(7, -5)$ , and crosses the  $x$ -axis at  $R$ .

(a) Write down the value of

(i)  $a$ ;

(ii)  $c$ .

[2 marks]

(b) Find the value of  $b$ .

[2 marks]

(c) Find the  $x$ -coordinate of  $R$ .

[2 marks]

6. [Maximum mark: 8]

In a large city, the time taken to travel to work is normally distributed with mean  $\mu$  and standard deviation  $\sigma$ . It is found that 4 % of the population take less than 5 minutes to get to work, and 70 % take less than 25 minutes.

Find the value of  $\mu$  and of  $\sigma$ .

7. [Maximum mark: 7]

A particle's displacement, in metres, is given by  $s(t) = 2t \cos t$ , for  $0 \leq t \leq 6$ , where  $t$  is the time in seconds.

(a) On the grid below, sketch the graph of  $s$ .

[4 marks]

(This question continues on the following page)

*(Question 7 continued)*

(b) Find the maximum velocity of the particle.

*[3 marks]*

Do **NOT** write solutions on this page.

### SECTION B

Answer **all** questions on the answer sheets provided. Please start each question on a new page.

8. [Maximum mark: 15]

The following diagram shows a circular play area for children.

The circle has centre O and a radius of 20 m, and the points A, B, C and D lie on the circle. Angle AOB is 1.5 radians.

(a) Find the length of the chord [AB]. [3 marks]

(b) Find the area of triangle AOB. [2 marks]

Angle BOC is 2.4 radians.

(c) Find the length of arc ADC. [3 marks]

(d) Find the area of the shaded region. [3 marks]

(e) The shaded region is to be painted red. Red paint is sold in cans which cost \$32 each. One can covers  $140 \text{ m}^2$ . How much does it cost to buy the paint? [4 marks]

Do **NOT** write solutions on this page.

9. [Maximum mark: 15]

Consider the function  $f(x) = x^2 - 4x + 1$ .

- (a) Sketch the graph of  $f$ , for  $-1 \leq x \leq 5$ . [4 marks]

This function can also be written as  $f(x) = (x - p)^2 - 3$ .

- (b) Write down the value of  $p$ . [1 mark]

The graph of  $g$  is obtained by reflecting the graph of  $f$  in the  $x$ -axis, followed by a translation of  $\begin{pmatrix} 0 \\ 6 \end{pmatrix}$ .

- (c) Show that  $g(x) = -x^2 + 4x + 5$ . [4 marks]

The graphs of  $f$  and  $g$  intersect at two points.

- (d) Write down the  $x$ -coordinates of these two points. [3 marks]

Let  $R$  be the region enclosed by the graphs of  $f$  and  $g$ .

- (e) Find the area of  $R$ . [3 marks]

Do **NOT** write solutions on this page.

10. [Maximum mark: 15]

At a large school, students are required to learn at least one language, Spanish or French. It is known that 75 % of the students learn Spanish, and 40 % learn French.

(a) Find the percentage of students who learn **both** Spanish and French. [2 marks]

(b) Find the percentage of students who learn Spanish, but not French. [2 marks]

At this school, 52 % of the students are girls, and 85 % of the girls learn Spanish.

(c) A student is chosen at random. Let  $G$  be the event that the student is a girl, and let  $S$  be the event that the student learns Spanish.

(i) Find  $P(G \cap S)$ .

(ii) Show that  $G$  and  $S$  are **not** independent. [5 marks]

(d) A boy is chosen at random. Find the probability that he learns Spanish. [6 marks]

---
