

PLACE VALUE ACTIVITY

The Place Value Park

Teaching with a
Mountain View

Thank YOU for YOUR DOWNLOAD!

This is a super simple activity that my students LOVED! Students will need a copy of the Place Value Park sheet as well as a blank sheet of white paper to create their parks.

Have FUN!

The Place Value Park

Follow the directions below to create your park! Remember the difference between PLACE and VALUE.

To find the number of blades of grass in your park: Write the current time as one whole number (Example: 11:53 is 1,153). The VALUE of the digit in the tens place is the number of grass blades in your park.

To find the number of trees in your park: Write your street address. The digit in the tens place is the number of trees in the park.

To find the number of apples in TOTAL on your trees: Write the first three digits of your phone number. The VALUE of the digit in the tens place is the number of apples on your trees.

To find the number of flowers in your park: Write the current year. The VALUE of the digit in the tens place is the number of flowers in your park.

To find the number of clouds over your park: Write the month and the day as one number (August 25 would be 825). The digit in the hundreds place is the number of clouds over your park.

To find the number of butterflies in your park: Write the number of students in your class and add three zeroes to the end of the number. The digit in the ten thousands place is the number of butterflies in your park.

To find the number of ants on the ground of your park: Write the month and day of your birthday as one number. The VALUE of the number in the tens place is the number of ants on the ground in your park.

To find the number of benches in your park: Write the number of days there are in the current month and add FOUR zeros to the end of the number. The digit in the hundred thousands place is the number of benches in your park.

To find the number of slides in your park: Write your zip code. The digit in the ten thousands place is the number of slides in your park.

To find the number of swings in your park: Write the year you were born. The digit in the thousands place is the number of swings in your park.

To find the number of kids at your park: Write your age and add five zeros to the end of it. The digit in the hundred thousands place is the number of kids at your park.
